

Worker's Compensation

- Report and document all accidents/injuries IMMEDIATELY to your supervisor and WSC program coordinator. Submit written summary to WSC.
- If you need care, find a doctor who treats Industrial Insurance patients.
- When completing L&I paperwork at the doctor's office, state that your organization is the "Employment Security Department" of Washington. Indicate you are a volunteer who receives a stipend, not an employee.
- Worker's compensation will pay medical benefits to members in case of injury while performing the usual and customary duties of their project assignment. It does not pay for time lost due to the injury.
